Reasons for Allowance

COMES NOW the Patent Office, by the Patent Examiner and opines at least a reason for the Allowance of this Application to wit: that the Prior Art neither teaches nor reasonably suggests the combination of acts for making a circuit board which include manufacturing an intermediate substrate having incompressibility, forming bonding layers on either side of the substrate, forming a plurality of through-holes in the substrate, filling conductive paste into the through-holes, manufacturing a double-side circuit board, including the steps of laminating metallic foils to either side of the intermediate substrate and heating the same under pressure and forming a first circuit pattern and a second circuit pattern by processing the metallic foils.
